

# MATHAF: ARAB MUSEUM OF MODERN ART

**Client:** Qatar Foundation (Qatar Petroleum)

**Category:** Fit-out

**Consultant / Project Manager:**

ASTAD

**Built-up area:** 3000 m<sup>2</sup>

The Arab Museum of Modern Art, built to celebrate works by Arab artists and offer an Arab perspective on international modern and contemporary art, was designed by renowned French architect Jean-François Bodin. Execution of the architect's concepts called for the use of unconventional construction methods.

The fit-out contractor needed a solution for the erection of ten-meter high internal walls. Domopan took on the challenge and adopted a top-down approach with the walls successfully installed and approved as per standards of the museum.
