

## BARWA CITY Ph-1, Pckg.-4 Interior of the Schools and Kindergartens in the Amenities Zones FIT-OUT PACKAGE

**Client:** Barwa City  
**Category:** Fit - Out  
**Consultant:** Aecom, MZ & Partners  
**Built-up area:** 36,250 m<sup>2</sup>

The Barwa City Project is a development designed to establish a modern community with a contemporary setting. The development comprises around 6,000 apartments in 128 buildings, spread across 1.35 million square meters. The East and West Schools of Barwa City will accommodate the educational needs of this community's children in a state of the art facility.

Domopan was directly nominated by the client, Barwa, to design and build of 36,250 m<sup>2</sup> of drywall partitions in the interior of the Schools and Kindergartens in the Amenities Zones. As the only local entity capable of achieving the safety and acoustic specification needed to achieve the educational environment envisioned in this school, Domopan had to coordinate with a consortium of reputable consultants including Aecom, MZ & Partners, Tanween, and Qatar Project Management (QPM).
